

Perla Soto Aguilar 5°PM

This screenshot shows the Visual Studio Code editor with the file 'greetingForm.html' open. The Explorer sidebar on the left shows the project structure: 'APLIWEB-PERLASOTO' containing 'css' (style.css), 'html' (greetingForm.html), 'js', and 'php' (greeting.php). The main editor area displays the HTML code for the form, which includes a meta viewport tag, a title 'Greeting', a link to 'style.css', and a form with three text inputs for 'nombre', 'edad', and 'telefono', along with a submit button labeled 'Enviar'.

```
10 <meta charset="utf-8" >
11 <meta name="viewport" content="width=device-width, initial-scale=1.0">
12 <title>Greeting</title>
13 <link rel="stylesheet" href="../css/style.css">
14 </head>
15 <body>
16 <h2><center>
17 <h1>Greeting Formulario</h1>
18 <hr>
19 <!--
20 | Forma que captura nombre con método GET
21 -->
22 <form action="../php/greeting.php" method="post">
23 <label for="nombre">Ingresa Nombre</label>
24 <input type="text" name="nombre" id="nombre">
25 <br>
26 <br>
27 <label for="edad">Ingresa Edad</label>
28 <input type="text" name="edad" id="edad">
29 <br>
30 <br>
31 <label for="telefono">Ingresa Teléfono</label>
32 <input type="text" name="telefono" id="telefono">
33 <br>
34 <br>
35 <input type="submit" value="Enviar">
36 </form>
37 </center></h2>
38 </body>
39 </html>
```

This screenshot shows the Visual Studio Code editor with the file 'greeting.php' open. The Explorer sidebar on the left shows the project structure: 'APLIWEB-PERLASOTO' containing 'css' (style.css), 'html' (greetingForm.html), 'js', and 'php' (greeting.php). The main editor area displays the PHP code, which includes a comment describing the script as a component to capture form data, the author 'Perla Soto', and the date '12 Octubre'. The code uses \$\_POST to retrieve the values of 'nombre', 'edad', and 'telefono' and echoes them back to the user.

```
1 <?php
2 /*
3  * Descripción: Componente los datos de formulario.
4  * Autor: Perla Soto
5  * Fecha: 12 Octubre
6  */
7
8 //Obtiene nombre de formulario
9 $name = $_POST['nombre'];
10
11 echo "Hola $name";
12 echo "<br>";
13 $eda = $_POST['edad'];
14
15 echo "Tu edad $eda";
16 echo "<br>";
17 $tel = $_POST['telefono'];
18
19 echo "Tu numero es $tel";
```
